WORK EXPERIENCE

Jul 2015 – Now

ASSURA SOFTWARE **.NET Developer**

I am taking .NET developer position which is to:

- Create technical specifications and estimation for the project.
- Design, develop for Assura application and other projects.
- Meanwhile provide technical support to the team of Implementation Consultants.

And I am using the following skills to achieve the projects successfully.

- IIS, ASP/ASP .Net, C# with object orientated programming, design patterns and development methodologies.
- HTML, JavaScript, JQuery, CSS, and some JavaScript frameworks like angular js.
- Microsoft SQL 2005-2012 and Microsoft SQL Server Reporting Services.
- Manage the source code with Team Foundation Server.

Apr 2015 – Jul 2015

VCARE INTERNATIONAL LIMITED **Mobile Application Developer(Part Time)**

I took my graduate project in VCare for Sales Mobile Application which uses a JSON web service to read and write user data from Jade database.

- My responsibility is to analysis, design and develop VCare Mobile Sales Application, which uses JavaScript, JQuery, HTML5, CSS3, JSON.
- The project uses Kendo framework and Cordova library and based on MVC for the main structure. Meanwhile, I use OOP, refactoring and design pattern to improve my source code as it needs. Moreover, I applied some solution to enhance the UI and UX, which is pretty satisfied by sponsors.

KEY SKILLS

Enthusiasm and Responsible for what I do: Have worked for IT Industry since graduation because completely interested and enjoy what I do.

Strong coordination and troubleshooting skills: Be well organized to address with multi-task. Have strong capability with problem finding and set up sensible solution.

Good communication: Always positively, genuinely communicate with people, and be trusted not only by technical ability but personality.
